SUMMARY

Recent Indiana State University graduate and early-career developer with strong skills in JavaScript, Python, C++, Git, and cloud platforms like AWS, Render, and Netlify. Passionate about writing clean, maintainable code, with hands-on experience in front-end development, Linux environments, and emerging frameworks.

WORK EXPERIENCE

Freelance Web Developer – Indianapolis, IN

July 2025 – Present

- **Attention to Detail:** Designed and developed a modern, responsive website for Northview Dental Indianapolis using Astro, a cutting-edge modern web framework and deployed to the Netlify platform for web hosting.
- **Customer Service and Communication:** I worked closely with the Dentist to determine their needs and wants to ensure that he was completely satisfied with the website.
- **Problem Solving:** Enhanced performance and search engine optimization to improve user engagement, mobile responsiveness, and accessibility.

Coding Instructor – iCode Academy, Fishers, IN

July 2025 – Present

- Teach coding fundamentals through project-based learning for young students
- Foster computational thinking and problem-solving in a collaborative environment

ACADEMIC PROJECTS

- Researched and presented honors thesis on the impact of Artificial Intelligence across industries and society
- Developed a full-stack calorie tracking application using HTML/CSS, Python, Django, PostgreSQL. Deployed on Render and AWS. Integrated the USDA FoodData Central API.

- Designed a tool to parse names, addresses, and phone numbers from text files and store them in MongoDB
- Guided the design of a mobile shopping app with case, class, and communication diagrams to improve clarity of login, cart, checkout, and order features

SKILLS

- Program Development
- Mobile Software Development Support
- Project Hosting & Deployment
- Problem Solving & Optimization

TECHNICAL SKILLS

Python, React, Astro JS, JavaScript, CSS, Assembly, C++, Linux, PostgreSQL, MongoDB, Data Structures, Web Development, Database Design, GitHub, AWS, Render
